Prior to Task Completion

What are your initial thoughts on the application?
How are you prompted to interact with the application?
What elements stand out to you and why?
How do you believe you would get started on the task?
What similarities can you identify between this app and others like it?

Following Task Completion

Did your perceived expectations for app interaction match how you used it?
What roadblocks did you encounter when attempting to complete your required task?
How might the interaction be improved to help you achieve your task?
Were there any key elements or features that prompted interaction in an unorthodox way?
When you made a mistake, how easy was it for you to recover in your task progression?
What did you enjoy most about this experience?
What did you enjoy least about this experience?
Were there any other features not explored today that peaked your interest, and why?
