

User Feedback - CAB302

Area Of Exploration:	
Find the Pattern Quiz	
Date:	05/05/2024
Version // Prototype:	Sprint 4
User Title:	User 1
Purpose of user testing // Task:	
From the dashboard Navigate to the quiz library and complete the Find the pattern quiz	

Prior to Task Completion

What are your initial thoughts on the application?
Headings are clear, except for the "Your activity:" heading, which is the only one with a colon and it looks like user metrics will be displayed underneath, which would be pretty cool and dynamic. "Quiz for you!" and "Puzzle for you!" could probably get combined and I'm not a fan of exclamation marks in headings.
How are you prompted to interact with the application?
There are buttons to Start Quiz and Start Puzzle on the large elements, and a navbar in the header that prompts navigation to other pages of the app. The news and reporting panel should ideally contain headlines that link to major reputable and relevant news sources.
What elements stand out to you and why?
"Complete your daily check-in" widget stands out by colour and complexity in the design. The Quiz for you! And Puzzle for you! Also use colour, size and visual design to stand out.
How do you believe you would get started on the task?
Quiz Library -> Find a Quiz labelled "Find the pattern" -> Enter the quiz.
What similarities can you identify between this app and others like it?
I haven't really encountered an app like this. (Have not used duolingo or other similar)

Following Task Completion

Did your perceived expectations for app interaction match how you used it?
Yeah, all the buttons I needed to use were clearly labelled and easy to find.
What roadblocks did you encounter when attempting to complete your required task?
It's not clear that you need to "select" a task before you press the buttons to interact with it.
How might the interaction be improved to help you achieve your task?
Clicking on a task should by default begin the task.
Were there any key elements or features that prompted interaction in an unorthodox way?
Mentioned in roadblocks.
When you made a mistake, how easy was it for you to recover in your task progression?
Didn't make any mistakes 😎
What did you enjoy most about this experience?
The maths questions
What did you enjoy least about this experience?
The next button being very far away from the answer selections
Were there any other features not explored today that piqued your interest, and why?
Other tests and possible metric tracking, I love seeing numbers go up.
